Lucknow, Uttar Pradesh

PROFESSIONAL SUMMARY

BCA (Data Science & AI) and Data Analyst skilled in Python, SQL, Power BI, and Streamlit. Proven track record in end-to-end analytics – data cleaning, EDA, time-series forecasting, ML, and live web app deployment on large real-world datasets.

SKILLS

- Programming Languages: Python, SQL
- Libraries: Pandas, NumPy, scikit-learn, Matplotlib, Statsmodel
- Tools: Power BI, MySQL, Jupyter Notebook, Excel, Streamlit
- Core Skills: Data Analysis, Visualization, Forecasting, Anomaly Detection

PROJECTS

Delhi Metro Network & Ridership Insights – Python • SQL • Power BI • Streamlit

- Analyzed 1,50,000 trip records (Jan 2022–Dec 2024) covering ~30 lakh passengers and ₹31.5 crore revenue across 24 stations; cleaned 28,257 missing values and engineered 7 new features (revenue, passenger segmentation, temporal attributes)
- Performed EDA revealing Saturday as peak ridership day, Tourist Card driving 39.47% revenue, and Rajiv Chowk as top hub with 3.5L+ passengers – indicating tourism-led demand over commuting
- Compared 8 ARIMA/SARIMA configurations; SARIMA(1,1,0)×(1,1,0,12) achieved lowest RMSE, generating 24-month forecasts (95% CI); applied Z-score anomaly detection flagging 57 days (5.2%)
- Deployed live Streamlit web app with real-time forecasting sliders and downloadable CSV reports; built 3-page Power BI dashboard with KPI cards, heatmaps & slicers; validated all metrics across Excel, MySQL & Python – 33/33 tests passed (100%)

Heart Failure Prediction Web App – Python • Flask • Scikit-Learn

- Built a Random Forest ML model on a structured healthcare dataset to predict heart failure risk; performed feature selection, preprocessing, and model evaluation
- Developed a Flask-based web application with real-time user input interface and integrated end-to-end model deployment

COVID-19 SQL Data Analysis – SQL • MySQL • Excel

- Cleaned and transformed large COVID-19 datasets using SQL joins, aggregations, window functions, and TRY_CAST operations
- Analyzed vaccination trends, rolling totals, and regional case statistics using MySQL

EDUCATION

- Bachelor of Computer Applications (BCA) – Data Science & AI
Babu Banarasi Das University, Lucknow, U.P
2023 – 2026 | Current SGPA: 8.76 (up to 5th semester)
- Class 12 – Science (PCM + Computer Application)
Montfort Inter College, Lucknow | Percentage: 82.6% | 2022 – 2023
- Class 10 – CBSE Board
Montfort Inter College, Lucknow | Percentage: 93.0% | 2020 – 2021

SOFT SKILLS

- Data-driven decision making and analytics
- Team Collaboration & Leadership
- Time Management & Prioritization
- Adaptability & Critical Thinking
